Verifique o tipo de sistema operacional do seu computador (32 ou 64 bits) para fazer o download da versão correta do QGIS

Acesse o site oficial do QGIS:  
[https://www.qgis.org/pt\\_BR/site/forusers/download.html](https://www.qgis.org/pt_BR/site/forusers/download.html).  
Selecione o instalador do QGIS 3.10

Faça o download da Orfeo Toolbox compatível com a versão do seu sistema operacional. Obs: A configuração vai ser realizada na aula

The screenshot shows a web browser window with the address bar displaying "orfeo-toolbox.org/download/". The page header features the Orfeo Toolbox logo (a stylized 't' with a red apple) and the text "Orfeo ToolBox" and "Orfeo ToolBox is not a black box". Navigation links include "Forum", "Download" (highlighted), "Documentation", "Blog", and "Community". The main heading is "Download". Below it, a paragraph states: "ORFEO ToolBox is distributed as open source under an **OSI-approved license**. Starting with **OTB 6.0**, the **Apache 2.0** license is used. For prior versions, the **CeCILL v2** licence is used. On all platforms, the **OTB** standalone package contains everything: applications for command line and graphical user interface, python bindings, Monteverdi and also official [remote modules](#)." Below this are four download buttons: "Win 64 bits", "Win 32 bits", "Mac OS", and "Linux". A link for "Installation Instructions" is provided. The "Notes for Windows install" section explains that standalone binaries for Windows are provided that do not require administrative privileges, and provides instructions on how to launch Monteverdi or the OTB application browser. A tip at the bottom suggests using 7-Zip for faster extraction speed. A "Privacy & Cookies Policy" link is visible in the bottom right corner.

## Download

ORFEO ToolBox is distributed as open source under an **OSI-approved license**. Starting with **OTB 6.0**, the **Apache 2.0** license is used. For prior versions, the **CeCILL v2** licence is used. On all platforms, the **OTB** standalone package contains everything: applications for command line and graphical user interface, python bindings, Monteverdi and also official [remote modules](#).

[Installation Instructions](#)

### Notes for Windows install

We provide standalone binaries for Windows which do not require administrative privileges. Download the archive below (32 or 64 bits), and extract it somewhere. Double-click on the *monteverdi.bat* to launch Monteverdi, or *mapla.bat* for the OTB application browser. Please see [the CookBook](#) for detailed installation instructions (You may need to *right click* -> *save as...*).

*Tips: Use [7-Zip](#) for faster extracting speed* (extraction should take around 15 seconds with 7-zip, but can take up to 10 minutes with the default Windows extractor)
